ISOframe® – Fabric

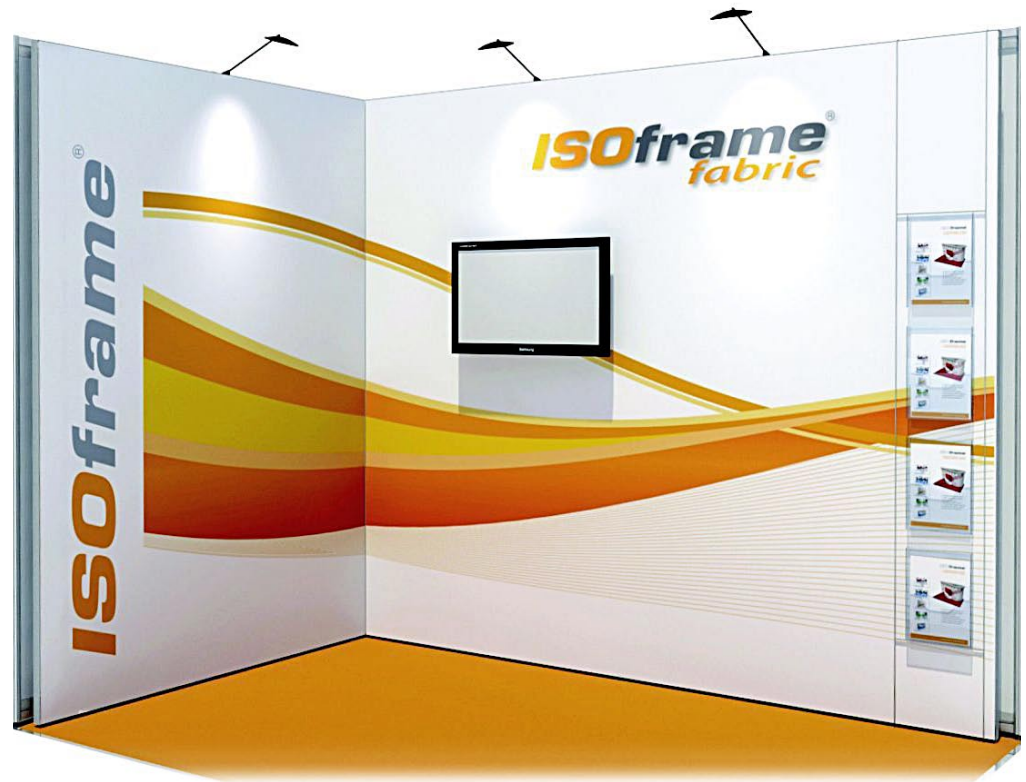

The ultimate lightweight self-build fabric system

Ideal for shell scheme or freestanding stands, our silicone-edged tension fabric system is extremely portable and with our unique FAST-clamp connector, gives a tool-free assembly, making it 15 times faster to build than conventional tension fabric frameworks.

- *Exclusive frame clamp creates perfect mitred corners and is 15 times faster to construct than rival fabric products*
- *Tool-less assembly*
- *Continuous, unrestricted fabric graphics*
- *Extremely portable, lightweight graphics*
- *Easy for the self-build market, both freestanding and shell clad*

Carrying bags are available.

Ideal for shell scheme stands or freestanding displays

Fabric is the latest addition to the ISOframe family. Silicone edged fabric simply glides into a channel in the metalwork to create a stunning, high impact display. Perfect for shell cladding or as a freestanding structure.

The system is our most portable yet; the fabric makes it possible to pack away the graphics in the smallest of spaces and the framework reduces down to easily fit in a car. Longer lengths can be used to reduce the number of components and cost. ISOframe Fabric is the fastest all-metal textile frame available. Our patented FASTclamp enables it to be built 15 times faster and without screws! ISOframe Fabric allows you to build your stand without leveling – it looks great even on the most uneven floor.

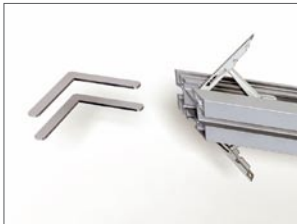

It is the ideal solution to shell scheme stands with added personality or for feature walls as part of a freestanding display.

Mounting fabric

The silicone edge simply glides into the channel.

Easy mounting in a few steps

Insert angle brackets into the profile.

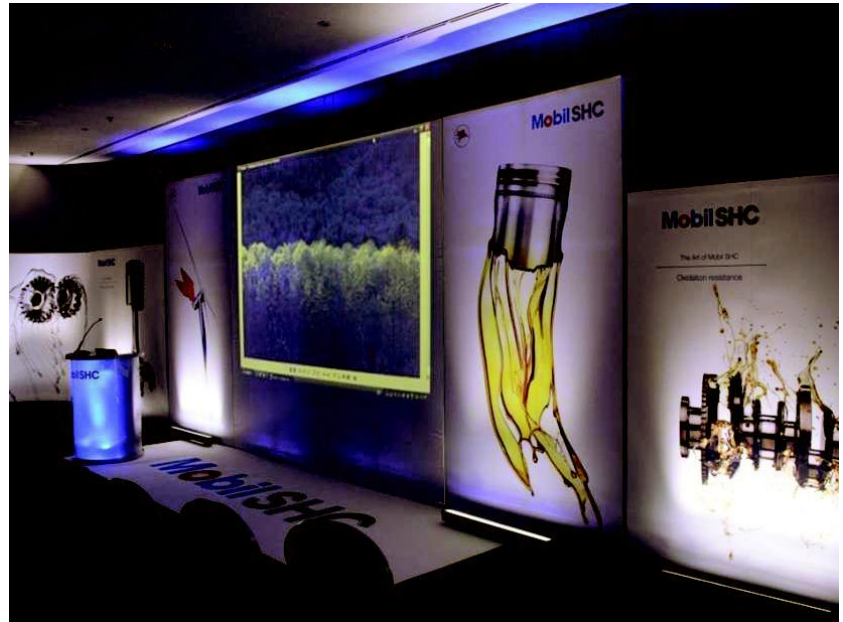

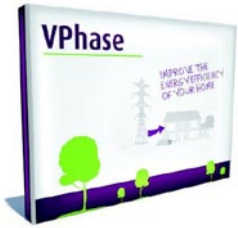

Snap the FASTclamp closed to secure.

Repeat with the second profile.

A secure connection without any tools!
